

The figure displays a 2D grid with the X-axis labeled from 0 to 4. The grid consists of black horizontal and vertical lines. A legend in the top right corner identifies two elements: 'Z error' represented by a green line and 'X-stabilizer defect' represented by an orange square. The orange squares are located at the following coordinates (X, Y): (0, 1), (1, 0), (1, 1), (2, 1), (3, 1), (4, 0), (4, 1), and (4, 2). Green lines connect these defects, forming a path that starts at (1, 0), goes up to (1, 1), right to (2, 1), down to (2, 0), right to (3, 0), up to (3, 1), right to (4, 1), and finally up to (4, 2). There is also a green line segment from (0, 1) to (1, 1) and another from (4, 0) to (4, 1).
